## Human Behavior and Leadership Thinking Development

“The unique way of his teaching, by using different tools and experiences during the class, was something new to me and he got my interest since the first moment. Being a member of one of the biggest IT companies and working in the Finance department, I can relate the meaning of his lessons to the business. Antonis taught me about life, business, and the connection with people.”

“Antonis is a very clever teacher who shows the path for more research to his student. He is a very organized character, and a perfect instructor for leaders' and managers' education. His educational method helped me improve not only my leadership practice, but to also complete myself as an individual.”
